

6 Month Accreditation Report – Human Services Center

Completed: March 28, 2019

Substance Use Disorder (SUD) Services

Medically-Monitored Intensive Inpatient Treatment Program (Level 3.7)

Human Services Center (HSC) review was completed by the Division of Behavioral Health staff for adherence to the Administrative Rules of South Dakota. The following information was derived from review of client file records. The recommendations made in this report are a result of reviewing of this information.

Client Chart Review Score: 90.7%

CLIENT CHART REVIEW SUMMARY

Recommendations:

1. According to ARSD 67:61:18:02, within 8 hours of admission, each client shall receive a medical evaluation, including a second reading of blood pressure, pulse and respiration, conducted by a RN or LPN. In review of the charts, three of the six charts were missing a second reading of blood pressure, pulse, and respiration within 8 hours. Ensure the evaluation by a RN or LPN is conducted twice within 8 hours of admission and the times are documented.
2. According to ARSD 67:61:18:02, within 72 hours after admission, each client shall receive a complete blood count and urinalysis and a complete physical examination by or under the supervision of a physician licensed by the state, who shall also evaluate the results of the tests conducted. In review of the charts, two charts were missing the urinalysis requirement. It is recommended that if a client transfers from within the hospital and did not have a urinalysis upon admission to the hospital one should be completed at time of transfer. If a client receives a complete blood count upon admission to the hospital a new blood count is not required upon transfer.
